Date: 8/24/2009	Time: 13:30	
Duty Officer/Responder Name: Gallo (Duty Officer)	NRC Report #: 915822	Hotline Log DataID: 688064
Action Information		
<p>Description: OSC Gallo contact and spoke with David Dukes of ConEd Emergnecy Response Team. Situaition is that primary feeder line (insulated with mineral oil) is showing slight drop in pressure/volume. This could be due to temperature changes in the feeder line or to a slow leak. Con Ed crews are traversing the feeding line with visual and other monitoring devices to try and identify / rule out any spill of material.</p> <p>This feeder line runs thru Manhattan, runs north under the Harlem River and into West Chester Co. Con-Ed has also deploy one of their response contractors (Ken's Marine) to collect observations in the Harlem River area.</p> <p>Con Ed to update the NRC and EPA if situation changes.</p>
